Summary

Extremely motivated software engineer with specialization in full-stack web development using Django and FastAPI and Node.js (React, Next.js). Looking to make cutting edge, scalable applications and tackle challenging problems. Combines sound programming techniques and algorithmic design methodologies with practical experience in CI/CD, databases, and AI integration. Excited to leverage tech skills to tackle complicated projects and drive real-world impact in a growth role

Skills

Programming Languages: Python, JavaScript, TypeScript, C++, Java, PHP, Kotlin, Bash
Web Technologies: Node.js, React.js, Next.js, Python FastAPI, Django, Angular, PHP Laravel
Databases: MySQL, PostgreSQL, Supabase, Prisma
Tools & Concepts: Git, Docker, CI/CD (GitHub Actions, Bitbucket, Netlify), VPS (Linux) Management, REST APIs, ORM (Django ORM, Prisma), Project Management, Problem Solving
AI/ML: LangGraph, Semantic Analysis, Natural Language Processing, Speech Recognition, Experience with ChatGPT & LLAMA 2 integration
Other: Redis

Experience

Full Stack Developer — *Jan 2025 – Present*

Aamira Software Solutions, Kokomo, Indiana, USA

- Led development of a customer relationship management system that increased client response rates.
- Architected and implemented a microservice backend solution using Node.js that reduced API response time.
- Optimized database queries using Prisma, resulting in a 35% improvement in application performance.

AI Code Reviewer — *Oct 2024 – Jan 2025*

Outlier

- Reviewed and improved code quality for AI systems serving 50,000+ daily users.
- Implemented automated testing procedures that reduced bug rates by 22% across the platform.
- Collaborated with senior developers to establish best practices for AI model integration.

Industrial Trainee — *Feb 2025 – Mar 2025*

Brain Station 23, Dhaka, Bangladesh

- Gained practical experience in enterprise software development methodology and practices.
- Served as Team Representative for a 15-person cohort, coordinating communication between management and trainees.
- Contributed to a student AI system using Next and Node.js that was deployed to online server.

Junior Software Engineer — *Nov 2022 – Apr 2024*

Code Studio, Rajshahi, Bangladesh

- Developed backends supporting 15,000+ daily users using JavaScript, TypeScript, and Python (Django).
- Managed 12 VPS (Linux) with 99.8% uptime and optimized CI/CD pipelines reducing deployment time by 40%.
- Implemented Docker containerization simplifying deployment across 5 different client environments.

Competitive Programming Teacher — *Aug 2023 – Nov 2023*

RAPL (University Organization)

- Instructed RUET students in competitive programming concepts, with 80% showing improved contest performance.

- Developed curriculum covering number theory and graph traversal algorithms; organized biweekly coding competitions.

Personal Projects

StudentAI - Intelligent Learning Companion *Feb 2025 – Mar 2025*

Repository: student_AI *(Backend)*, student_ai_next *(Frontend)* | *Live:* student-ai-next.vercel.app

- Developed during industrial attachment at Brain Station 23: AI-powered learning assistant combining **FastAPI backend** with **Next.js frontend** for personalized education.
- Implemented intelligent quiz generation, document Q&A, and YouTube content analysis using LangChain and semantic search with conversation memory.
- Built comprehensive document processing pipeline supporting PDFs, images, and videos with real-time WebSocket chat, JWT authentication, and progress tracking.
- Deployed production-ready application on Vercel (frontend) and Render (backend) with Supabase database integration.

Hotel Management System *Jan 2024 – Mar 2024*

Repository: github.com/mehedi37/hotel_management

- Developed **PHP-Laravel** hotel management system with secure authentication, CSRF protection, and SQL injection prevention.
- Built responsive Bootstrap UI interface with comprehensive CRUD operations for efficient room management and bookings.
- Deployed with 99.8% uptime on live server with multi-user support as final project for EDGE programming course.

Gamers Heaven - E-commerce Platform *Dec 2023 – Feb 2024*

Repository: github.com/mehedi37/gamers_heaven

- Built full-featured gaming e-commerce platform (**ASP.NET Core MVC with C#**) with secure role-based access control.
- Implemented Entity Framework Core with code-first approach for database management and migrations.
- Developed comprehensive shopping cart system with product management, payment processing, and responsive Bootstrap UI.

Education

B.Sc. Engineering, Computer Science and Engineering *Mar 2022 – Present*

Rajshahi University of Engineering & Technology (RUET), Rajshahi, Bangladesh

- Current Semester: 6th semester
- CGPA: 3.73 (till 5th semester)

Certifications & Achievements

- Digital Accessibility Training (DAT) - a2i (Aspire to Innovate), Govt. of Bangladesh: View Post (Oct 2025)
- PHP (Laravel) - EDGE Project: View Certificate (Feb 2025)
- 4th Place - RUET CodeSmash (Team Competition) - Competitive Programming Contest (March 2023)
- 4th Place - RUET CodeSpark (Individual) - Competitive Programming Contest (Oct 2022)

Languages

- Bangla (Native)
- English (Full Professional Proficiency)
- Japanese (A1 level)

Interests

3D Design, Artificial Intelligence, Machine Learning, Full-Stack Development (Node.js, Python), Competitive Programming, Cloud Technologies, Open Source Contribution
