Subject: Application for the post of Lecturer, Department of Computer Science & Engineering

Dear Sir/Madam,

I am writing to apply for the position of Lecturer in the Department of Computer Science and Engineering at BRAC University, as advertised on the university's career portal. I completed my B.Sc. in Computer Science and Engineering at RUET with a CGPA of 3.75/4.00, and my primary interests lie in Artificial Intelligence, Data Science, Causal Inference, and Software Engineering, areas your School has identified as priority specializations.

My undergraduate thesis, TRACE, fuses prerequisite-graph analysis, Bayesian modeling, and aspect-based sentiment analysis to detect learning bottlenecks in student curricula, with findings causally validated on over 23,000 real student records using DoWhy backdoor-adjustment methods. Alongside this research, I bring nearly four years of experience as a software engineer, building production systems in Python, TypeScript, and AI/ML frameworks including LangChain and PyTorch, and I have mentored fellow students at the RUET Advanced Programming Lab.

I enjoy both teaching and research, and I would welcome the opportunity to bring this combination of academic and industry experience to BRAC University's School of Data and Computational Sciences.

Thank you for considering my application. I look forward to the opportunity to discuss my candidacy further.

Sincerely,
MD. Mehedi Hasan Maruf
B.Sc. in Computer Science and Engineering
